Manenberg Mosaic Project

In 2016 we were contracted through the City of Cape Town to train 20 youth members of the community of Manenberg in the art of making mosaic.

The three month program saw 14 students complete their training, during which time we used an assortment of glass and ceramic mosaics to create 170m² of mosaic designs onto mesh backing which will be installed on a new housing development in the Manenberg Community.

Manenberg Mosaic Project

Phase 2

The work on the left is an indication of the design created for a 70m2 installation at the railway entrance and exit to the Civic Centre in Cape Town.

Once again, we were contracted by the City of Cape Town and the Manenberg Team had an opportunity to showcase their skills. We included two members of Deaf SA in our team and were featured on the SABC news.
